Toy Memory Game

Eight pictures, two identical copies of each.

Print the card sheet once: it already contains sixteen cards. Each card is 42 x 60 mm at actual size. Trim the outside rectangle, then cut the shared straight grid lines. There are no headings or footers on the card sheet.

Use opaque card stock, or glue the whole uncut sheet to plain card. Let it dry flat before cutting. Check that no picture shows through from the back. Keep every back identical; no separate card-back file or double-sided alignment is required.

For a first game choose two complete pairs. Shuffle the four cards and place them face down in a square. The example below shows a matching pair revealed; start your game with all four hidden.

Turn over two cards. If they match, keep the pair and take another turn. If they differ, let everyone see them and turn them back in the same places; the turn passes. Continue until every pair is found.

Add more complete pairs when ready. The full set makes a four-by-four layout. Play together to find every match, or compare the number of collected pairs. A round can finish in a tie.
