How to Play Toy Bingo

For 2-6 players and one caller. Reprint different cards for another group.

1. Print a different numbered player card for each player.
2. Print the 12 calling pictures. Cut the outer rectangle, then the grid lines.
3. Shuffle the calling pictures face down. Keep player boards whole.
4. Turn over one picture, show it and say its name.
5. Players mark that picture if it is on their board. Leave the called card visible.
6. Three marked pictures in a row, column or diagonal wins. There is no free space.
7. Check all three against the called pictures. More than one player may win together.

Use pencil crosses on plain paper, or an erasable cover with a suitable marker.

To play again, use a fresh print or clear your erasable cover.

The caller has all 12 toys; each player board has a different selection of nine.

Example: one marked diagonal on player card 1. Doodle Orchard
